

# STARTRACK UPDATE

# TWU-STARTRACK EA BARGAINING HAS CONCLUDED

The bargaining process to renegotiate your next Enterprise Agreement (EA) has concluded.

Despite the CEO Paul Graham backflipping on his promise of an 11 November 2026 expiry date, your member-led TWU bargaining committee won significant TWU claims and staved off a raft of **StarTrack claims intended to gut your EA.** 

Below is a recap of where we started and where we got to in this bargaining round.

# WHERE WE STARTED: STARTRACK CLAIMS YOUR COMMITTEE SUCCESSFULLY FOUGHT OFF

- > Removal of the Road Transport Award safety net
- > Freight handlers to work 6-hours before a break
- Removal of status quo and reducing the scope from the disputes process
- Removal of the WA state-based ratio
- > Simplifying the EA and putting terms and conditions into policy
- Removal of income protection from the WA and SA appendices
- To maintain the 6.1% difference in pay with 2 x CPI increases **not being passed on** to outside hire and contractors impacting site rates.
- > Introducing **delivery targets** for drivers

# CLAIMS STARTRACK WOULDN'T PUT A FORMAL POSITION IN THE EARLY STAGES OF BARGAINING (BECAUSE IT NEVER INTENDED TO FOLLOW THROUGH ON THE CEO'S 2021 COMMITMENTS):

- One national agreement with an expiry date for the maximum agreeable term
- **Backpay** to 1 September 2024

This agreement contains massive improvements to pay, terms and conditions which the Committee is proud of achieving.

Congratulations to the TWU national bargaining committee who worked hard to achieve the wins.

However, it will not be forgotten that the CEO Paul Graham reneged on his 2021 commitment to the 2026 EA expiry, this has been a massive breach of trust to StarTrack workers.
